NHI and Airport College International collaborate for training solutions

Airport College International announces the launch of its new partner National Hospitality Institute (NHI) that will be representing AirportCollege.com in the sultanate.

Global air traffic is expected to double in the next 20 years, creating millions of new jobs. The aviation industry faces a huge challenge to deliver training for new workforce. The industry needs to attract new talents by providing new training methods and forward-looking career paths. At the same time, the training should be relevant, user friendly and cost effective.

Pertti Mero, CEO of Airport College International, said, "The aviation sector is growing and Oman is pushing ahead with efforts to boost tourism and cargo numbers through the expansion of its aviation infrastructure and provides a significant number of new jobs in the near future. Together we can provide high quality and efficient training solutions."

Robert MacLean, principal, NHI, said, "The aviation sector has been boosted by govern-

ment investments and a stronger aviation sector not only has the potential to benefit trade, SMEs, tourism and logistics, but it can also support the promotion and awareness of Oman on a global scale. We strongly believe that we can help airlines, ground handling companies, logistics service providers as well as job seekers to save on training costs without compromising the quality of training."

AirportCollege.com is a complete online training service for airlines, airport ground handling agents and logistics. With the training service, our clients can efficiently and flexibly train their staff and maintain the competences required by authorities. Airport College International is a strategic partner of IATA.

NHI SAOC is the leading provider of quality vocational training for the hospitality, catering and travel industries in the Gulf region.

Located in Muscat, Oman, NHI operates with the clear intent of providing the most comprehensive and professional training possible.
